

Logan Teeple

Mechanical Engineer

loganjteepale.com- (949)339-8629 - Loganjteepale@gmail.com - <https://www.linkedin.com/in/loganteepale/>

EDUCATION

Olin College of Engineering, GPA 3.94, Needham, MA, Mechanical Engineering, May 2028

SKILLS

Mechanical Design: SolidWorks, Onshape, XFLR5, MATLAB, AVL

Electrical/Software Design: KiCad, Github, Python, ArduPilot

Manufacturing: 3D printing, Laser Cutting, Reflow Oven, Soldering, Composites, Mill, Lathe, Tormach CNC, Mig & Tig Welding

EXPERIENCE

Aerodynamics and Mechanical Lead sUAS Team

September 2024 - Present

- Designed and fabricated wing and composite fuselage. Lead integration of mechanical and electrical systems.
- Designed, built, and test flew VTOL aircraft in two days.
- Wrote an autonomous gradient descent based flight path algorithm with Python.

Olin SAE Baja Gearbox and Rear Drivetrain Lead

September 2024 - Present

- Designing and fabricating the gearbox and integration to chassis and output on a robust off-road car using SolidWorks. Optimizing for space, ease of manufacture and repair.

Project - Autonomous Ground Effect Vehicle with Lidar

May 2025 - Present

- Fully designed, analyzed and manufactured a sea plane GEV with Onshape, 3D printing, and COTS parts.
- Optimized for efficiency using XFLR5 and AVL aerodynamic analysis tools.
- Controlled with ArduPilot control logic on a Pixhawk Flight controller.

Research - Analyzing the Future of Commercial Aircraft Design

August 2022 - June 2023

- Completed meta-analysis research and trade studies to determine the future of commercial aircraft will be.
- Worked with an Aerospace Engineer from Boeing's Advanced Concepts Team to analyze key technical developments.

Private Pilot

June 2022 - Present

- 140 Flight Hours
- Aircraft Flown: Cessna 172, 206, 208, 182, Grumman Tiger, Diamond DA40

Founder, Aero Teach Systems

December 2024 - Present

- Real world models of aircraft systems to aid in teaching student pilots.
- Selling to flight schools across the country.
